

July 25, 2018

Good Evening,

We are happy to report that the Landmarks Preservation Commission has approved our request to build an expanded kiln room and an elevator. Their approval will go on to the Department of Buildings for approval and shortly thereafter we shall get permits. (You can find the original announcement and plans on the [Resource page](#) of our website.) Once we have the permits, we will be able to announce the timeline for groundbreaking.

We want to thank all of you—especially those that came out and spoke on behalf of the Pottery—for your support and encouragement. This is a tremendous step forward for the Pottery as we work to improve the studio for our entire community.

Sincerely,

A handwritten signature in black ink that reads "Adam Welch".
